EDUCATION

Vivekananda School of Engineering and Technology

Delhi, India

Bachelor of Technology (Artificial Intelligence and Data Science) | **CGPA: 8.03**

Sep. 2023 – May 2027

Senior Secondary (Class 12th): School Of Specialized Excellence

Percentage: 85.4

RESEARCH & PUBLICATIONS

A Sentence-Level Risk Estimator for Identifying Hallucinations in Generative AI 🔗

January 2026

- *International Conference on AI-Driven Smart Systems and Ubiquitous Computing (ICAUC), 2026*
- Presented a research paper proposing a framework to detect hallucinations in generative AI at the sentence level.
- Designed a unified risk scoring approach combining semantic similarity (BERT), QA-based factuality checks, and NLI entailment.
- Aimed to improve the reliability and factual consistency of large language model outputs.

HACKATHONS & ACHIEVEMENTS

1st Place – PromptWars | Innerve 2026, IGDTUW 🔗

March 2026

- Won 1st place at PromptWars (competitive prompt engineering) at IGDTUW among teams across Delhi NCR.

Top 10 – Paranox 2.0 National Innovation Hackathon | TechXNinjas (Microsoft for Startups)

Nov 2025

- Qualified to the Pre-Final round (Top 10 teams) out of a national-level field across a 3-month field.

PROJECTS

Upstart | Next.js, React, Node.js, Express.js, SQLite, Google Gen AI, Google Trends API, Tailwind

March 2026

- Built an AI-powered platform that transforms startup ideas into validated business plans and 4-week MVP roadmaps.
- Integrated Google Generative AI and Google Trends to generate market insights, tech stacks, and execution strategies.
- Developed a custom feasibility scoring system based on user skills, project complexity, and timelines.
- Implemented a secure Next.js dashboard with JWT authentication and PDF export for project management.

Emotion-Based Movie Recommender System 🔗 | Python, OpenCV, DeepFace, TMDB API, MySQL

March 2025

- Built a smart movie recommendation system that detects users' facial emotions in real-time and suggests movies accordingly.
- Used DeepFace with OpenCV to detect dominant emotions via webcam (happy, sad, angry, etc.).
- Integrated TMDB API to fetch dynamic movie data based on genre mapped to user emotion.
- Implemented TF-IDF + Cosine Similarity for content-based filtering to recommend similar movies.
- Stored user preferences in a MySQL database, enabling personalized and adaptive recommendations.

RelayVault 🔗 | Next.js, TypeScript, Solidity, Hardhat, Wagmi, Viem

April 2026

- Built full-stack Web3 protocol (Solidity + Next.js) for on-chain agent discovery, atomic negotiation, and trustless escrow — deployed to Monad & Hardhat.
- Implemented AgentRegistry, NegotiationEngine, TaskEscrow, VaultWallet; integrated Wagmi/Viem for deterministic payouts, reputation bonds, and dispute resolution.

TECHNICAL SKILLS

Languages: Python | Java | C | HTML/CSS | JavaScript | React | SQL

Technologies/Frameworks: React | Tailwind CSS | shadcn/ui | Node.js | Express | Docker | AWS (EC2)

Databases: MySQL | MongoDB | PostgreSQL

Developer Tools: VS Code | Jupyter Notebook | Google Colab | Git/GitHub | GitHub Actions | Conda

LEADERSHIP / EXTRACURRICULAR

- Lead the organization and management of technical events, workshops, and webinars focused on data science and AI. Oversee team coordination to ensure smooth event execution and active student participation. 2025 – Present
- Conducted technical sessions for the Data Science Club, engaging over 100 participants in hands-on learning.
- Previously involved with the Google Developer Student Clubs (GDSC) and the college's Code Society, where I contributed to community learning, code reviews, and technical discussions. 2024 – 2025
