EDUCATION

Vivekananda School of Engineering and Technology <i>Bachelor of Technology (Artificial Intelligence and Data Science) CGPA: 8.03</i>	Delhi, India Sep. 2023 – May 2027
Senior Secondary (Class 12th): School Of Specialized Excellence	Percentage: 85.4
Secondary (Class 10th): Govt Sarvodaya Co Ed Vidyalaya	Percentage: 82.6

RESEARCH & PUBLICATIONS

A Sentence-Level Risk Estimator for Identifying Hallucinations in Generative AI • <i>International Conference on AI-Driven Smart Systems and Ubiquitous Computing (ICAUC), 2026</i> • Presented a research paper proposing a framework to detect hallucinations in generative AI at the sentence level. • Designed a unified risk scoring approach combining semantic similarity (BERT), QA-based factuality checks, and NLI entailment. • Aimed to improve the reliability and factual consistency of large language model outputs.	January 2026
---	--------------

HACKATHONS & ACHIEVEMENTS

1st Place – PromptWars <i>Innerv 2026, IGDTUW</i> • Won 1st place at PromptWars (competitive prompt engineering) at IGDTUW among teams across Delhi NCR. • Built and deployed the Devcation hackathon website using Next.js 15 and Matter.js. devcation-n7m7.vercel.app .	March 2026
Top 10 – Paranox 2.0 National Innovation Hackathon <i>TechXNinjas (Microsoft for Startups)</i> • Qualified to the Pre-Final round (Top 10 teams) out of a national-level field across a 3-month hackathon.	Nov 2025

PROJECTS

Upstart <i>Next.js, React, Node.js, Express.js, SQLite, Google Gen AI, Google Trends API, Tailwind</i> • Built an AI-powered platform that transforms startup ideas into validated business plans and 4-week MVP roadmaps. • Integrated Google Generative AI and Google Trends to generate market insights, tech stacks, and execution strategies. • Developed a custom feasibility scoring system based on user skills, project complexity, and timelines. • Implemented a secure Next.js dashboard with JWT authentication and PDF export for project management.	March 2026
Emotion-Based Movie Recommender System <i>Python, OpenCV, DeepFace, TMDB API, MySQL</i> • Built a smart movie recommendation system that detects users' facial emotions in real-time and suggests movies accordingly. • Used DeepFace with OpenCV to detect dominant emotions via webcam (happy, sad, angry, etc.). • Integrated TMDB API to fetch dynamic movie data based on genre mapped to user emotion. • Implemented TF-IDF + Cosine Similarity for content-based filtering to recommend similar movies. • Stored user preferences in a MySQL database, enabling personalized and adaptive recommendations. • Enabled users to confirm or adjust detected emotions to improve accuracy and user control.	March 2025

TECHNICAL SKILLS

Languages: Python, Java, C, HTML/CSS, JavaScript, React, SQL
Developer Tools: VS Code, Eclipse, Jupyter Notebook, Cursor
Technologies/Frameworks: Git, GitHub

LEADERSHIP / EXTRACURRICULAR

Core Member – Cluster (Data Science Club) <i>Event Management Head</i>	2025 – Present <i>Vivekananda School of Engineering and Technology</i>
• Lead the organization and management of technical events, workshops, and webinars focused on data science and AI. Oversee team coordination to ensure smooth event execution and active student participation.
